

each other to form a single ring; and R<SP>5</SP> and R<SP>6</SP> or R<SP>7</SP> and R<SP>8</SP> may be combined with each other to form an alkylidene), ring-opening (co)polymers represented by the formula, hydrogenation products thereof and grafted products thereof and 40-1 pt.wt. aromatic vinyl/conjugated diene elastomer having a refractive index different from that of the former component by at most 0.03. The aromatic vinyl/conjugated diene elastomer is a thermoplastic elastomer comprising a styrene, butadiene, etc., and is desirably hydrogenated SBS or hydrogenated SIS.
